Some Papers on Eyewitness Identification

The first two papers below describe our early research using a ‘confidence procedure’ as an alternative to traditional identification tests. The third paper describes studies showing how jurors interpret information from such procedures. A large paper describing the recent research I presented at the conference is being submitted for publication soon.

Brewer, N., Weber, N., Wootton, D., & Lindsay, D. S. (2012). Identifying the bad guy in a lineup using deadlined confidence judgments. *Psychological Science*, 23, 1208-1214.

Sauer, J. D., Brewer, N., & Weber, N. (2008). Multiple confidence estimates as indices of eyewitness memory. *Journal of Experimental Psychology: General*, 137, 528-547.

Sauer, J. D., Palmer, M. A., & Brewer, N. (in press, accepted December 21, 2016). Mock-juror evaluations of traditional and ratings-based eyewitness identification evidence. *Law and Human Behavior*. <http://dx.doi.org/10.1037/lhb0000235>

The other papers listed below are just some examples from my publications of research on other issues.

Lavis, T., & Brewer, N. (2016). Effects of a proven error on evaluations of witness testimony. *Law and Human Behavior*. <http://dx.doi.org/10.1037/lhb0000217>

Sauer, J. D., & Brewer, N. (2015). Confidence and accuracy of eyewitness identification. In T. Valentine & J. Davis (Eds.), *Forensic facial identification: Theory and practice of identification from eyewitnesses, composites and CCTV* (pp. 185-208). London, UK: Wiley-Blackwell).

Horry, R., Halford, P., Brewer, N., Milne, R., & Bull, R. (2014). Archival analyses of eyewitness identification test outcomes: What can they tell us about eyewitness memory? *Law and Human Behavior*, 38, 94-108.

Powell, M. B., Garry, M., & Brewer, N. (2013). Eyewitness testimony. In I. Freckelton & H. Selby (Eds.), *Expert evidence: Law, practice, procedure and advocacy* (5th ed.), 65-1-5072. Pymont, NSW: Thomson Reuters.

Brewer, N., & Wells, G. L. (2011). Eyewitness identification. *Current Directions in Psychological Science*, 20, 24-27.
